

Chemistry expertise onsite and around Australia

NATURAL RESOURCES

SGS is the world's leading inspection, verification, testing and certification company.

SGS is recognised as the global benchmark for quality and integrity. With more than 89,000 employees, SGS operates a network of over 2,600 offices and laboratories around the world. We are constantly looking beyond customers' and society's expectations in order to deliver market leading services wherever they are needed. Working together to make the world a better, safer place.

WHY CHOOSE SGS

We have a history of undertaking and successfully executing large-scale, complex international projects.

With a presence in every single region around the globe, our people speak the language and understand the culture of the local market and operate globally in a consistent, reliable and effective manner.

We provide innovative services and solutions for every part of the oil, gas and chemicals industry. Our global network of offices and laboratories, alongside our dedicated team, allows us to respond to your needs, when and where they occur.

"SGS is a trusted leading lab services provider to major clients around the world, across all industry sectors. We offer comprehensive bespoke services to support and optimise every part of your production and value adding chain. SGS' innovative solutions can be offered either independently or as packages to augment your existing processes."

JUAN SMITH
NATURAL RESOURCES GENERAL MANAGER

Our reputation for independence, excellence and innovation has established us as the market leader in providing services that improve efficiency, reduce risk and deliver competitive advantage for you.

INDUSTRY EXPERIENCE

Our analytical chemists have been working in industrial facilities testing commodities such as LNG, LPG, condensate, chemicals, oils and gases.

Within Australia we have more than 50 offices and over 1,700 employees, this placed SGS as a leading service provider to manage staffing for onsite chemists and lab technicians.

Our large laboratory infrastructure foot prints and supported by our technical management teams can also cater for your specialised requirement.

Whether you are looking to renew an existing lab, or to establish a new one, SGS has a very broad and strong industry knowledge to assist you to accomplish your laboratory objectives.

We also understand the challenges and complications of running a high standard in-situ QC laboratory system. SGS can provide a full scope of managing your entire laboratory operation and allow you to get on with your core production focus.

To learn how SGS can help you with the above requirements contact us.
